

COVID-19

STOP THE SPREAD OF GERMS

— prevent the spread of respiratory viruses like COVID-19 & flu —

TEMPERATURE CHECKS

Fever can be a symptom for many viruses including COVID-19. We require all donors and staff to submit a temperature check.

ENHANCED CLEANINGS OF HIGH-TOUCH SURFACES

Sanitization has always been a LifeShare priority, we have increased frequency of cleaning and disinfecting, focusing on high-touch-surfaces, such as donor beds, restrooms, buttons, handrails, tables, faucets, doorknobs, and shared keyboards. Increased frequency of cleaning and disinfecting with attention to these areas helps remove bacteria and viruses, including the novel corona-virus.

MASKS OR FACE SHIELD

LifeShare requires all staff on the donor room floor to wear a mask or face shield. Together we can prevent the spread of airborne viruses.

CPR TRAINED STAFF

LifeShare team members are CPR trained if the need should arrive. Feel confident that you are in good hands.
